**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 26-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 26 now recites "mixing... in a screw conveyor... and said moisture level is reduced to a final moisture level "y" wherein  $y < x$ ". Applicant defined "y" as being the "final moisture level" on page 4, wherein the final moisture level is attained after drying and cutting the extruded product. There does not appear to be support for defining the intermediate moisture level produced solely by the screw conveyor as being equal to the "final moisture level" produced after drying and cutting as disclosed on page 4 of the application.

### ***Response to Arguments***

3. Applicant's arguments filed 11/13/06 have been fully considered but they are not persuasive.

Applicant argues that support for the amendment was provided by paragraph 0028 of the published application. However, that paragraph does not define "y" and

Art Unit: 1761

does not refer to the final moisture level of the product. Furthermore, applicant defined "y" as being the "final moisture level" on page 4, wherein the final moisture level is attained after drying and cutting the extruded product. There does not appear to be support for defining the intermediate moisture level produced solely by the screw conveyor as being equal to the "final moisture level" produced after drying and cutting as disclosed on page 4 of the application.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
